

# Fetal Alcohol Spectrum Disorders

## *Evidence-based Interventions for Children with FASD*

Thursday, January 16, 2020  
6:30-8:00 PM

This webinar will present an overview of interventions found to be effective through controlled studies for children affected by prenatal alcohol exposure. The interventions discussed will be those from other developmental disorders and found effective for children with FASD as well as those developed for children affected by prenatal alcohol exposure. Specifically, the interventions presented will cover behavior and self-regulation (e.g., Alert Program© and GoFAR), social skills (e.g., Children's Friendship Training), family support (e.g., Families on Track), and academic skills (e.g., Math Interactive Learning Experience). **Presenter Dr. Molly N. Millians** is a clinical educational specialist with the Emory Neurodevelopmental Exposure Clinic, Department of Psychiatry and Behavioral Sciences, Emory University School of Medicine.

## *FASD from a Trauma Lens*

Tuesday, February 11, 2020  
6:30-8:00 PM

Parenting a child with a disorder on the fetal alcohol spectrum can present many challenges for foster and adoptive families. It is vital for these families and professionals who support them to understand the reason behind the learning and behavioral challenges so they, together, can "try differently". **Presenter Barbara Clark** has spent over 25 years working with at risk youth in public schools, is an adoptive parent of a child with FASD and currently works with the North American Council on Adoptable Children (NACAC) coordinating post-adoption supports.

**Trainings are free of charge.** These sessions are open to **all** parents, caregivers, and professionals, though content will address issues of particular relevance to foster, adoptive and kinship families. Formed Families Forward offers training and support for foster, adoptive and kinship families raising children and youth with special needs.
